

SafeinTrain

Solutions for Safety

SafeinTrain Engineering Services

You are looking for a partner to realize your projects in the context of **safety** or **embedded systems**?

You need a partner with **long standing expertise** in these fields? You are looking for an **economical** solution for a safety system?

You need an efficient solution to assess a **pre-existing** system or software as a safety system?

Then the SafeinTrain GmbH is your choice:

Our multi disciplinary team consists of experts in the domains Computer Sciences, Electronics, Physics, Chemistry and Mathematics. Our team enables you to develop the optimal solution for your projects.
